

Cystoscopy Tray, Urology Resection Tray, and Pediatric All-in-One Tray

**Custom Protection,
Ultimate Security**

Customer-Driven Design

The reprocessing needs of the Central Processing Department (CPD) and the Perioperative Department are answered with the new Richard Wolf Urology Trays—providing custom protection with ultimate security.

The CPD is an essential element to hospital operations. Daily demands can be challenging, and every expenditure is scrutinized in this cost conscious healthcare environment. The new urology tray line from Richard Wolf is designed to help ease the financial burden of maintaining instruments as well as offering unparalleled scope protection.

- Inventory management made easier with trays that fit both adult or pediatric endoscopes and instruments
- Assembly completed accurately with brackets that have both outline and label guides for every instrument
- Sterility maintained by specially designed soft tray corners and molded feet to reduce torn wrappers

Key Features: Tray and Bracket Construction

A Place for Everything and Everything in Its Place

- Utility box with silicone mat for small, loose components and accessories
- Outline and label guides for each endoscope and instrument bracket
- Placeholder for light and electrical cables

Safety First

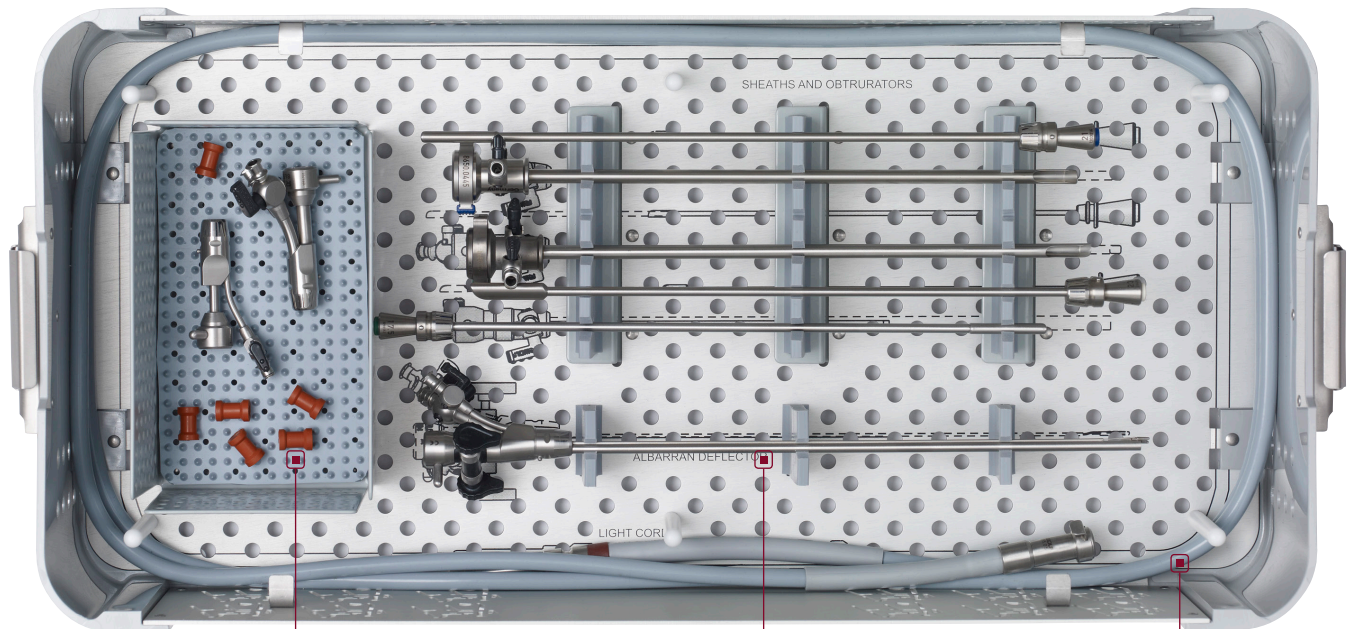

- Trays are designed to secure the endoscopes and instruments into the brackets during tray transport
- Soft silicone scope brackets use a side approach to help prevent scope damage and can be used with or without a scope protector

Cystoscopy Tray (8585030)

- Enables optimal configuration with two tray levels for basic cystoscopy endoscopes and instruments
- Includes placeholder for light cable
- Contains utility box for accessories

LEVEL 1

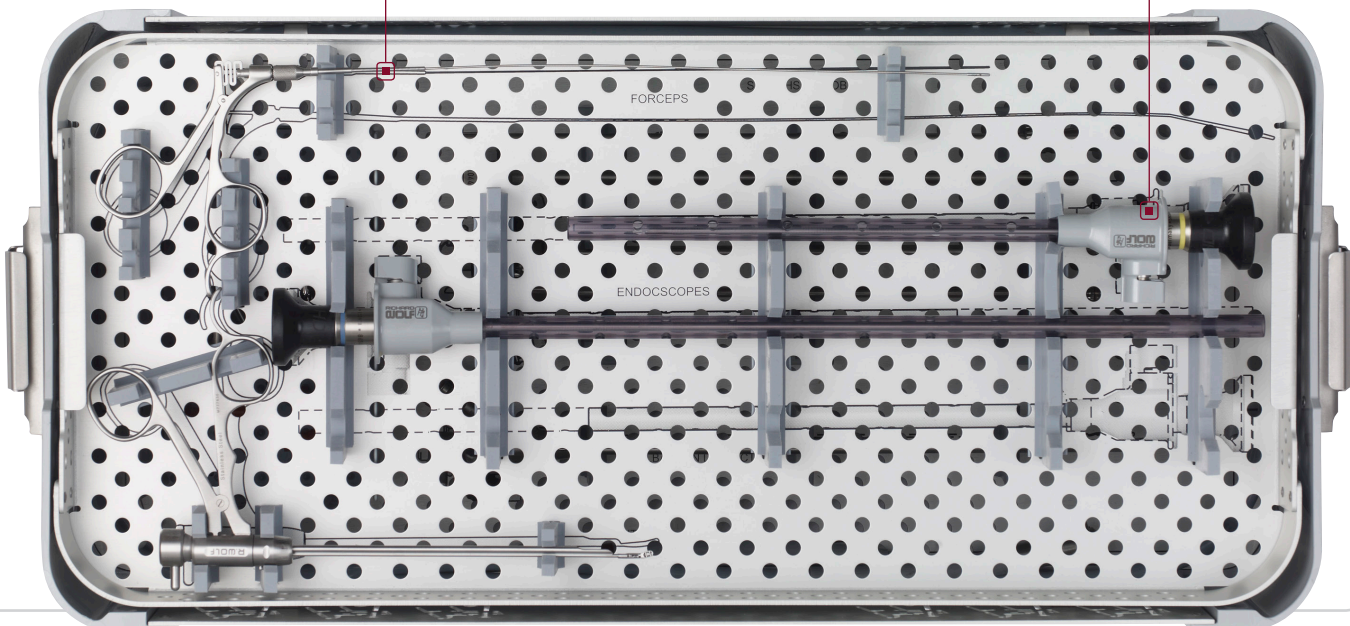

Convenient utility box for accessories

Instrument outlines guide CPD and OR staff during tray assembly

Light cable fits conveniently in perimeter of tray

LEVEL 2

Brackets secure adult and pediatric urology instruments (adult shown here)

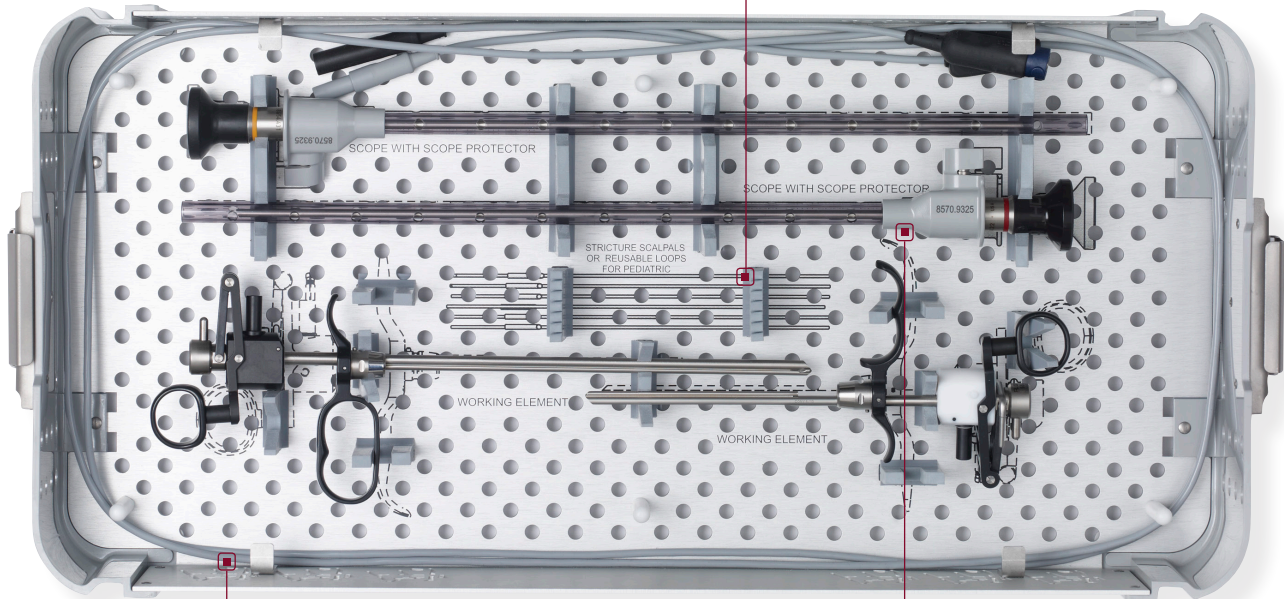

Brackets secure adult and pediatric endoscopes, with or without scope protectors (pediatric shown here)

Urology Resection Tray (8585030)

- Enables optimal configuration with two tray levels for urology resection endoscopes and instruments
- Includes placeholder for HF cable
- Contains utility box for accessories

LEVEL 1

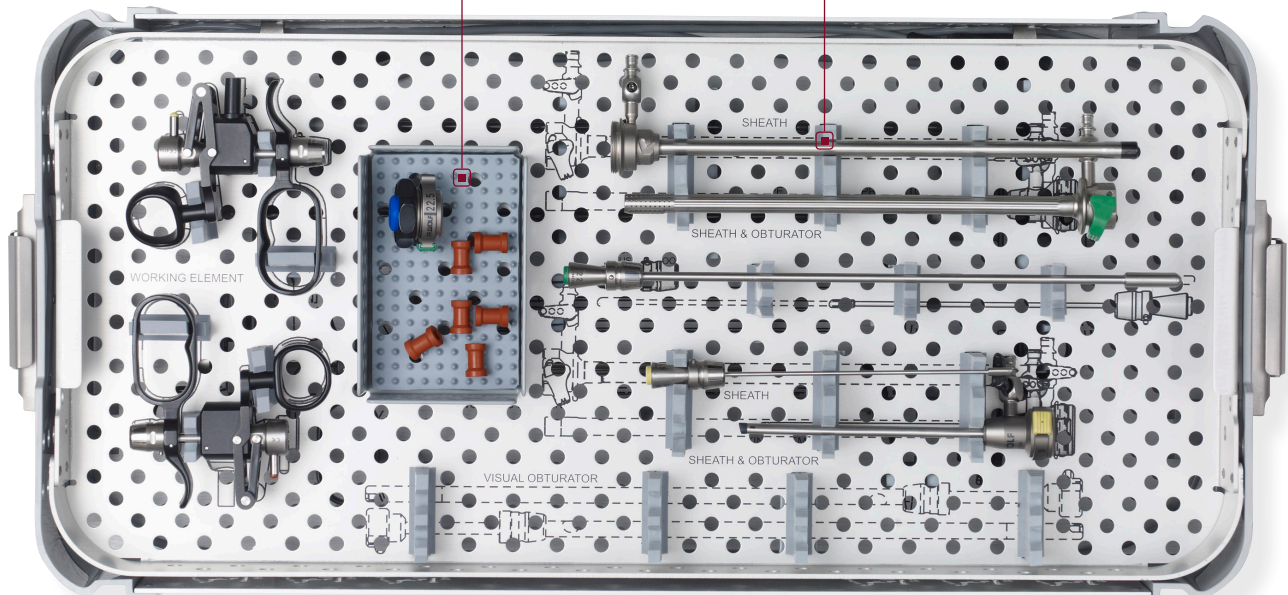

Uniquely designed brackets hold pediatric stricture knives and reusable loops

HF cable fits conveniently in perimeter of tray

Uniquely designed brackets fit scope protector

LEVEL 2

Convenient utility box for accessories

Uniquely designed brackets fit adult or pediatric sheaths (adult shown here)

Custom Protection, Ultimate Security
