27" Full HD Medical Monitor

Small footprint, larger image

27" Full HD Medical Monitor

Small footprint, larger image

Richard Wolf offers this new 27" Full HD medical grade monitor with a slimmer profile and larger display.

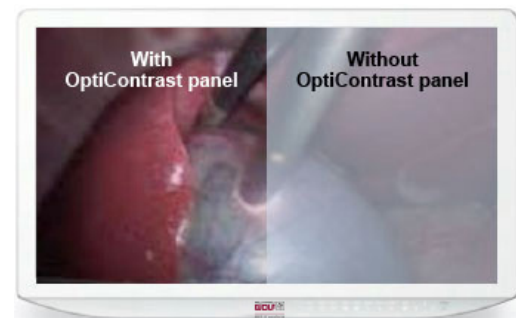

Product features

- Slim profile and narrow bezel for a wider display area
- Exceptionally bright, full HD screen with OptiContrast Panel™ for vivid, high-contrast images
- A.I.M.E™ Technology (Advanced Image Multiple Enhancer) with four contrast modes and eight color modes for a contrast-enhanced sharper image
- Multiple display modes (PIP, POP, side-by-side, mirror image)
- Flat, no edge, water resistant front panel for fast, easy and thorough cleaning
- User-friendly control panel with up to three customizable buttons for commonly used functions

OptiContrast Panel™

The OptiContrast Panel™ uses a layer of uniquely formulated resin between the panel and the glass to help reduce glare and reflection and establish vibrant images.
